Depth PAN DEPTH Release NS REL.Rate FLANGER RATE Release NS REL.

User Loop Phrases and song Loop Phrases can be overwritten. With this, Arrangement mode is activated, and you will be able to use the BR1600CD's rhythm arrangement feature. In this mode, patterns and Loop Phrases arranged to form a rhythm arrangement will provide accompaniment whenever you start playback. The Track Type Select screen will appear. Flashing fig.20003d Drum sounds will be played only when the BR1600CD is recording or performing playback. Drum sounds

will be played even when the BR1600CD is stopped. Although every drum, bass, and Loop Phrase If this button's indicator is lit meaning you're in pattern has its own beat setting, there is also a Arrangement mode, press PROGRAMMABLE universal beat setting that can be applied to all drum. This allows you to contained in the BR1600CD at the time of purchase are avoid inadvertently erasing data you have edited.Note that the tempo set here is used only for checking that the drum pattern is as required. In other words, this tempo will not be saved with the drum pattern. The selected item of performance data will be deleted.Swing will be generated in accord with the specified value. A setting of 100% delays the weak beats by the. In the case of SMFs supporting the GM, GS, or XG fig.20041d standards, drumtype performance data is generally assigned to MIDI channel 10. By setting the MIDI channel to 10 in such a case, you can ensure that only the drum data will be extracted from the SMF. Flashing Bass sounds will be played only when the BR1600CD is recording or performing playback.Although playback may stop for a period of 1 to 2 seconds when the bass sound is changed, this is normal and is not the result of a malfunction. You can specify bass pattern chords as described below to 6. If you wish to store the chord specification, save the hear how the bass pattern will sound playing different current song p. Practicing before recording QTZ Rehearsal Moves bass notes to the nearest quarter note.

GATE gate time 10% to 95% When the value is lowered, the more staccato the performance will become. The performance data will be updated with this new note setting. No swing will be applied.This name will also be lost if you turn off the BR1600CD before saving. The BR1600CD supports this type of song creation method and allows you to freely arrange and play Loop Phrases You should select "LOOP PHRASE" here. The BR1600CD will play the contents of the audio file Preview.The Loop Phrase screen will appear.The user rhythm arrangements and song rhythm arrangements contained in the BR1600CD at the time of It is important to remember that whenever a fixed tempo purchase are empty; you won't hear anything if you select is set, all tempos previously set for individual measures one of them. The tempo can be set anywhere within a range of 25.0 to 250.0 BPM. For example, if the root is "D," performance to notes that match the chord progression. The fastest of these tempos is the BPM setting of 140.It is a good idea, therefore, to regularly Copying a rhythm arrangement save rhythm arrangements that you intend to use again. In addition to setting of a single tempo and beat for an entire rhythm arrangement, the BR1600CD can also set these 6. Move the cursor to the parameter whose setting you. The Beat Map screen will appear. This The BR1600CD allows you to back up all of the data on the deselects all data types.When the to recover.Wait until 10. Move the cursor to the right half of the screen and this indicator stops flashing and turns off before specify the location of the importdestination. The BR1600CD is ready for selection of a new track. Here, you cannot specify a track on top of another track that has already been specified. If you are using CDRW discs, you will be able to erase fig.4128d unneeded data from the discs and reuse them for data storage. If silence is included at the end of your finished. You can use the normal procedure for audio CD playback Basic Operation; p.

70 at this time to hear the Important Notice selected song. No synchronization signal will be transmitted. You will need to match the BR1600CD's MTC type to that Whereas frames are continuous with the nondrop used on the external MIDI sequencer. For more information. The BR1600CD will start to record MIDI timing clock signals. Note that it will not be possible to perform playback or recording while these signals are being recorded. In addition, it will also not be possible to play back rhythm 3. This parameter is used to set the BR1600CD's MMC In this type of setup, the BR1600CD will act as master for operation mode.Note, however, that if initially assigned to the BR1600CD's faders and expression you fail to turn the BR1600CD off in accordance pedal. In addition, when an insert effects patch is selected on the BR1600CD, the bank and number for that patch are transmitted from MIDI OUT as Bank Select and Program Change messages. The following functions can be assigned to VALUE knobs. The BR1600CD allows you to freely modify the clip numbers assigned to track buttons and the control MIDI message. The playback of recorded VLINK

control operations will start as the BR1600CD begins playback, and the Recording control operations video device will be controlled automatically. Although you will be able to perform control operations With VLINK turned on, carry out the following procedure. Drag the WAV or AIFF file to the computer's folder and drop it in the folder. 11. Quit the connection to the computer. Drug the "BR1600CD" icon to the Trash. The USB Import screen will appear. At the time of purchase, a frequency of 440 Hz is set for A4 in the BR1600CD, and if this is Tuning suitable, there will be no need to change the setting. These settings for muting will be lost when the BR 1600CD is turned off. Muting for all tracks will be initially off when the BR1600CD is turned on again.

If for any reason the hard disk can no longer be written to or read from, or if you immediately want to delete all data from the disk, you can carry out Disk Initialize. Failure to observe this precaution could considerably reduce the life span of the hard disk or could result in it being permanently damaged. Action 1 Prepare the waveform file so that it is longer than 0.5 seconds. Marker Memory Full! Cause The BR1600CD has used up all the events that Cause The BR1600CD has used up all the marker can be handled by one song.Cause All of the remaining memory was used up during the Sync Track recording process.This VTrack is marked as the final mastering track so that it may BR1600CD operations in the various modes are as follows be easily recognized and selected when the mastered audio is to be written to a music CD later on. When INPUT or BOUNCE is selected fig.9301 Level Meter Level Meter Pre Fader Post Fader Insert. TRACK TYPE SELECT button.THRESHOLD. Track Type Select screen.Threshold. For the USA FEDERAL COMMUNICATIONS COMMISSION RADIO FREQUENCY INTERFERENCE STATEMENT This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. No part of this publication may be reproduced in any form without the Listening to your audio CD Audio CD Play "Owner's Manual". If you want to synchronize the BR1600CD with another MIDI device using MTC, you will first of all need to set both to the same MTC specification. At the time of purchase, the number of frames per second will initially be set to 30 non drop on the BR1600CD. Set the polarity switch as shown below. Before making any connections, make sure. Move the BR1600CD and guitar further apart to eliminate this noise. The AC adaptor should not be disconnected while data is being saved as this will result in the loss of recorded audio data and other song contents i.e., mixer settings, effect patch data, etc.. The Utility screen will appear.

Demo songs are stored on the BR1600CD. Let's now select one of these songs to listen to. Refer to the Demo Song List leaflet. fig.0705. Use the following procedure to set the function of the foot switch. Moves you to the time location 00000000.00. After the BR1600CD has checked the VTracks currently selected for each track, the current position will jump to the point in the song at which the last recording was made. Position for playback This function can also be combined with punchin and punch out to carry out loop recording Owner's Manual; p. 45. fig.0709f 2,4,5 Move to the song position from which. Currently selected VTrack not containing The VTrack screen will appear. The symbol indicating the currently selected VTrack You will now hear the song with the variation that will move to this new VTrack. In a situation like this, the BR1600CD allows you to temporarily turn off the audio from specific tracks Track Mute. For example, let's select USE DRUMS for this song.This type of output is referred to as an analog signal. If the volume of an analog signal is too high, unpleasant distortion will occur in the corresponding digital signal;. At the time of purchase, the BR1600CD's preset patches P001 to P050 and user patches U001 to U050 will contain the same effects. BR1600CD is recording or performing playback. The BR1600CD will start playback of the drum track. Lit Drum sounds will be played even when the BR1600CD is stopped. If you select "U" or "S" at this time the BR1600CD will not be able to play back a rhythm track. Although you will not be able to hear the drum pattern during this period, this is normal and is not the result of a malfunction. Although this section described a playback method where a basic rhythm Drum Pattern of one or several bars in length was repeated indefinitely, you can also arrange and play back drum

patterns that have been matched to a song structure comprising Intro, Verse, Fill, Bridge, Break, and End Crash elements in any order.

Use the INPUT LEVEL knob to ensure that the peak display for any level The level meters on the display change in response to the instrument's volume.VOCAL The BR1600CD will display a screen Reverb Send A single knob is displayed for INPUT 2. for adjusting the amount of the audio being sent from SIMUL each track to the reverb. If the output of to flash. This capability is referred to as "overdubbing.". Useful tip for overdubbing When you are making a new recording while listening to previously recorded tracks, these tracks can drown out the sound of the instrument currently being played, making it difficult to hear. In addition, sound will become distorted and external audio devices such as headphones may be damaged. Since each track has its own send level, the degree to which each track is affected can be easily changed—for example, a lot of reverb can be applied to vocals, a little reverb can be applied to drums, and so on. VALUE dial to adjust the send level until you like what you hear. In addition, you can also record from one track to a different track using just the BR1600CD in a procedure known as "bouncing.". It is important, therefore, that you save your songs regularly. Furthermore, if you intend to create an audio CD later on, you must save the bounced mixdown track at this time. If the power is turned off without saving the song, all newly recorded audio data, edited data, modified mixer settings, etc. Start playback on the BR1600CD, and select the patch that gives the best sound for your song. For more information regarding the modification of Mastering Tool Kit settings, refer to "Modifying Mastering Tool Kit settings Edit". When you subsequently use Disc At Once p. 62 to create an audio CD, the BR1600CD will give priority to the selection of final mastering track for songs that you want to write to the CD. In this way, album creation and other similar operations can be carried out much more conveniently.

The data recorded in the BR1600CD's audio track is. Once this process has been completed, you can proceed to the Move the cursor to the DISC. The data recorded in the BR1600CD's audio track is converted into CD format. With the BR1600CD, however, you can use the marker function to set divisions at the desired points within such an audio track so that it can be written as separate songs. For more details, refer to "Convenient functions for audio CD creation" Owner's Manual; p. 216. In addition to CDR discs, this drive can be used to play back CDRW discs that cannot be played on standard CD players. Naturally, you will also be able to listen to commercially produced audio CDs on this drive, and it can even play back audio CDs created using the BR1600CD that have not yet been finalized. To use the BR1600CD, please read this book first. No part of this publication may be reproduced in any form without the written permission of BOSS CORPORATION. Stay up to date with Roland news, artists, promotions, events, and more. Provides an overview of key features, functions and operational tips. The Roland Worldwide Social Network keeps you connected to the latest products, exciting events, and much more. Mixer section with 13 faders, 16 individual assignable 3band track EQs, and 8 dedicated compressors. Builtin GT6 guitar multieffects processor, proprietary COSM amplifier, speaker and microphone modeling effects for guitar, bass and vocals. Separate assignable multieffects group with reverb, delay, chorusing and other modulation effects. Builtin drum sequencer with huge library on internal hard disk of drums and percussion sounds and loops, separate drum, bass, and loop phrase tracks with autolock sync to sequencer track. Let us know YOUR RECENTLY VIEWED ITEMS Browsing History ON Clear History Not responsible for typographical or illustrative errors. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age

of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. See All Buying Options Add to Wish List Disabling it will result in some disabled or missing features. You can still see all customer reviews for the product. It did help me start to understand the unit as to what things did and why. I wished he went into deeper explainations other then saying mess with it your ears will find the best setting. But after putting a good year into the unit he was right hes not gonna tell you what sounds best for you. If you think your going to watch it and blow out recordings like a pro its not likley. True you will have a better understanding and I will have to say its great to go back to the video to reference things in the begginning. Time and more time and trying different recording projects will build up your experience with the unit. I am now working with a sequencer and other midi keyboards and drum machines all sync together with the unit and its wonderful now. The video bearly touched on any of that stuff. I would suggest buying a good drum machine that flam and rolls and midi it to the BR the drum sounds. The BR drums sound great but having more controll over sensitivity and effects help create better drum patterns to play into unit using BR drums. But time on the unit will get you their and experimenting will get you better at finding the level of sounds and realizim you want, it also depends on what type of music your trying to record.

He also does not cover the need for a good sound proof booth to record in how it makes a world of difference or a very good mic and headphones can make a world of difference. You cant blame the BR1600 for you not getting great recordings if you dont have the toolls to record. Its putting the time into trying and experimenting. I took me a good year before I was able to feel confident with how to produce a good sound and thousands of dollars to get the room setup to record. The guitar sounds are so so in the unit and I find micing a amp to beat all the programed guitar sounds. So dont beat yourself up it will take practice to get a good sound and the video only outlines what each thing does. Some things he breezes over so fast youll find your self rewinding the video to catch it. But most of the stuff he explains is good. I would say you will need the video to break through the learning process. The Booklets a bit deep at times with the video it really helps. But in time it all makes sense if you keep on keeping on it. I am still trying to gain proficiency on this machine. It is a very, very complex recording device. The pages of both my manuals are worn, dog eared from usage. I purchased the BR1600 DVD Training Tutorial to aid my failed attempts and frustrations with trying to master this monster. This DVD compresses all the BR1600 features and functions into 110 minutes. Ive seen the entire DVD three times, and studied selected chapters. The end result is the DVD is really a complete usage overview, rather than a thorough training course for BR1600 owners. BR1600 features are visually articulated with more emphasis rather than repeated efforts made to educate the user. Prior education is required before successful handling can be achieved. The visual overviews and operations will aid your confidence in knowing it is possible to fully appreciate all the technical marvels offered by the BR1600.Please try again later. James Greene 3.

0 out of 5 stars I am still trying to gain proficiency on this machine. The visual overviews and operations will aid your confidence in knowing it is possible to fully appreciate all the technical marvels offered by the BR1600.Please try again later. Please try again later. Ed D 4.0 out of 5 stars So the video was what to get. It did help me start to understand the unit as to what things did and why. But in time it all makes sense if you keep on keeping on it.Please try again later. Please try again later. Eric Calloway 5.0 out of 5 stars Finally got it. Just what I expected, a great visual guide. Ive gotten one for the dr880 as well and its just as good. Most people complain that he moves to fast and he does but all the info is there. I have yet to get the BR 1600 in the mail but ot seems like a beast. If you do decide to purchace one, just know that its basically a DAW. So theres some severe depth.Please try again later. Please try again later. Randall Bragg 4.0 out of 5 stars Learned a lot and easy to follow step by step methodology.Please try again later. Please try again later. Stratcat58 5.0 out of 5 stars I cant stress this enough.Please try again later. Please try again later. mjbarney 5.0 out of 5 stars Please try again later. Please try again later. James Wayne 5.0 out of 5 stars A huge

bummer!Please try again later. Please try again later. Saucy Jack 4.0 out of 5 stars Thanks for making these great tutorial videos. Saucyjack; CanadaPlease try again later. Please try again later. S. Batson 5.0 out of 5 stars I already had some experience with home 4 track cassette recorders and previously owned a BR8 also by Roland I was not too thrilled at the price of this DVD, but after reading about it in a Yahoo group for BR1600 users I figured Id get one. I have learned alot of new tricks and tips from this video. The narrator of the video is the demonstrator and he is very good with this thing.

After watching this video I now have a better understanding of the unit and can program it much better.Overall useful to beginners and experienced users alike !! Scot Boston, MAPlease try again later. Please try again later. RB 5.0 out of 5 stars Price was lower than other vendors and shipping was very reasonable. Delivery was alot quicker than I expected. Product was laid out with a detailed index for easy to find subjects. I look forward to using this DVD to further my knowledge of the BR1600.Please try again later. Please try again later. Loop effects Arming Tracks Setting up a click track Recording our 1st track Overdubbing Punching In Repeat AB Using V Tracks Setting up Phantom power Storing your song. Microscope I would recommend it to anyone. G G. BR1600 Refresher Ive owned a Boss BR1600 multitrack recorder for years and have relied on the user manual to navigate through the various menus and features. Not until I ran across Davids tutorial recently did I have a way of quickly refreshing my memory on all the functions within the recorder. I have purchased a number of products from ProAudioEXP over the years and all have been informative and easy to follow. So the video was what to get. After putting a good year into the unit he was right hes not gonna tell you what sounds best for you.If you think your going to watch it and blow out recordings like a pro its not likley. The BR drums sound great but having more controll over sensitivity and effects help create better drum patterns to play into unit using BR drums. But time on the unit will get you their and experimenting will get you better at finding the level of sounds and realizim you want, it also depends on what type of music your trying to record.Its putting the time into trying and experimenting. I took me a good year before I was able to feel confident with how to produce a good sound and thousands of dollars to get the room setup to record.
