If you need assistance in finding what you need, please complete our CONTACT US form at the top of our website. We ship anywhere in the United States and Canada. Extreme caution must be exercised to prevent unauthorized access by children. The cord may not be properly grounded and the connection is a shock hazard. NOTE Watkins Manufacturing Corporation requires that the Elation be installed on a minimum 10.2 cm thick reinforced concrete pad or structurally sound deck able to support the "dead weight". NOTE Watkins Manufacturing Corporation requires that the Moorea be installed on a minimum 10.2 cm thick reinforced concrete pad or structurally sound deck able to support the "dead weight". NOTE Watkins Manufacturing Corporation recommends that the Martinique be installed on a minimum 10.2 cm thick reinforced concrete pad or structurally sound deck able to support the "dead weight". NOTE Watkins Manufacturing Corporation recommends that the Kauai be installed on a minimum 10.2 cm thick reinforced concrete pad or structurally sound deck able to support the "dead weight". NOTE Watkins Manufacturing Corporation requires that the Moorea be installed on a minimum 10.2 cm thick reinforced concrete pad or structurally sound deck able to support the "dead weight". Control Panel 21. Atlas Neck Jet Pillow 9. Atlas Neck Jet Pillow 3. Atlas Neck Jet 3. Euro Directional Jet 8. The Geneva, Niagara, Tahitian, Elation, Aspire, Moorea. Connecting the spa to an improperly wired circuit will negate many of the spa's safety features. Reinstall the skimmer basket, weir, filter and filter lid once the spa is filled. A small amount of water may have remained in the plumbing after testing and, as a result, may have spotted the spa shell or the spa siding prior to delivery. Before filling the spa, wipe the spa shell clean with a soft rag. The flow of the neck jets is regulated by turning the Atlas Neck Jet valve on the inside wall of the spa. <http://www.dressedupdogs.com/userfiles/ford-territory-owners-manual-pdf.xml>

The air jets deliver air bubbles to provide subtle pulsation for a gentle, soft tissue massage. When the "AIR" button is pressed, the air symbol will illuminate on the control panel display. The symbol will remain lit until the button is pressed to turn off the air blower, or after fifteen minutes when the blower is automatically shut off by the control system. AIR JETS BUTTON Available on Geneva, Niagara, and Tahitian spas The "AIR" button activates the air blower. When the "AIR" button is pressed, the air symbol will illuminate on the main control panel display. The symbol will remain lit until the button is pressed to turn off the air blower, or after fifteen minutes when the blower is automatically shut off by the control system. Once enabled, a lock will remain active until the specific button combination is applied to disable the lock. Even if power is disconnected from the spa and soon thereafter reapplied such as a power outage, the lock will remain in place. Remove leaves, foreign matter, and debris. It is very important to keep your spa filter cartridge clean and free of particles to ensure proper water flow. Leave unions loose. NOTE Tighten the unions prior to filling the spa. 12. For Geneva, Niagara, Tahitian, Elation, Aspire, Moorea, Hawaiian, Martinique and Kauai, disconnect the circulation pump and use the shop vac to remove water. Stains and dirt generally will not adhere to your spa's surface. A soft rag should easily remove most dirt. Stains and dirt generally will not adhere to your spa's surface. Most household chemicals are harmful to your spa's shell. Cleaning of the surface should only be done with a nonabrasive, nonsudsing cleaner. Water maintenance is one of the least understood, yet most important areas of spa ownership. Your dealer can guide you through the process of achieving and maintaining perfect water in your spa, given your local conditions. <http://hoteldishagangtok.com/userfiles/ford-territory-tx-service-manual.xml>

Your program will depend on your water's mineral content, how often you use your spa, and how many people use it. Nitric acid will cause severe chemical burns if direct skin contact is made, so always wear protective gloves, glasses and clothing when working on the ozonator or injector lines. Answer The cartridge must be replaced every four months. Please refer to the instructions provided with each Monarch silver cartridge. Never cut, or kink the wires that connect the sensors to the thermostats within the control box. The jet pump is equipped with a thermal overload cutoff switch that is designed to protect the pump from overheating. If the pump shuts itself off in an older spa, it could indicate failure of the pump motor bearings. If this doesn't help you correct the problem, follow the appropriate instructions below. If this doesn't help you correct the problem, follow the appropriate instructions below. If the problem still is not resolved, call your Caldera dealer. Acquarella, Aquatic Melodies, Aspire, Atlas, Caldera Spas, Elation, EnergyPro, EcoTech, EcstaSeat, Euphoria, EuroPulse, Geneva, Kauai, LumbarSage, Martinique, Monarch, Mystique, Niagara, OrbiSage, Pure Comfort, Sole Soothers, SpaGlo, Tahitian, VersaSage, and UltraMassage are trademarks of Watkins Manufacturing Corporation. Please keep this manual available for reference. Utica, MI 48315 5863236191. See our stepbystep instructions below Starting up your new Caldera Utopia or Paradise Series hot tub is not as overwhelming as it might seem. We realize you may see conflicting information, especially if you are getting tips and advice from the Internet.

It's important to remember that not all hot tubs are made to function in the same manner, so please call your salesperson if you have any questions about starting up your hot tub for the first time. If you have well water private or community we strongly recommend using a prefilter attachment on your water hose to reduce and eliminate problematic minerals from entering your hot tub. Please take the time to read thru the following instructions before starting to fill your new spa and refer to the section below, Hot Tub Water Care Guide, for how to properly balance your new spa's water. Remember the following as you go through this process Do not fill the spa with hot water, as tripping of the highlimit thermostat may result. Do not use your spa after filling until all of the steps listed below are completed. Before filling your spa for the first time, remove the equipment compartment door and check to ensure that the unions on either side of the pumps and heater are handtight. Steps for filling your spa CLOSE ALL DRAINS, remove the filter compartment cover, skimmer basket, weir, and filter. Unscrew the Spa Frog cartridge caps and remove cartridge before filling. The water level of your spa should be maintained at approximately one inch above the highest jet in the spa. Reinstall the filter and then the skimmer basket, and weir once the spa is filled. Your water level should be above the skimmer basket of the filter compartment. IMPORTANT Watkins Manufacturing Corporation does not recommend that the spa be filled with "softened" water, as this may damage the spa's equipment. After the spa has been filled with water and the equipment compartment door is secured, power must be applied to the spa. FIRST activate power to the subpanel from the main house panel. NEXT open the door of the electrical subpanel and reset the GFCI breaker. FINALLY, close and secure the subpanel door.

CHECK THE OPERATION OF THE JET SYSTEM and to purge any remaining air from the heating system, push the "JETS" button on the control panel three times once for Kauai model to run the jet pumps on high speed for one minute. Once the jet system is fully operational as indicated by strong, nonsurging jets, priming of the spa is complete. Turn off the jets by pressing the "JETS" button until all jets have turned off. If you do not feel a steady stream of water from your jets, refer to the instructions for priming the pump in the SPA TROUBLESHOOTING section in your Owner's Manual. IMPORTANT Be sure that the diverter is in position 1 or position 2 see illustration on diverter valves in Owner's Manual before priming the pump for the first time. Make sure you secure the cover in place using the cover locks. Periodically check the spa water temperature. Please refer to our Hot Tub Water Care Guide for more detailed instructions on balancing your hot tub's water. You may

raise the water temperature to your desired degree. Hot Tub Water Care Guide for Caldera Spa Customers Balancing your hot tub water should not begin until your spa is heated to the desired temperature. As your water heats up, pH and Alkaline levels may change, so it's important not to rush through the startup process. Once your hot tub has achieved the desired temperature, you may test the spa water for the first time with your test strips. Simply dip the test strip in the water and then pull the strip out of the water and line up the colored pads on the strip to the back of the bottle. Make a note of what your readings are before adding any chemicals to the water. Ideally, your spa's pH should read between 7.2-7.6 ppm and the Alkaline should be between 80-120 ppm. The following instructions are for any customers using an OZONE system. If you have a FRESHWATER SALT system, please scroll to the bottom of this page for a video tutorial on starting up your new FreshWater Salt System.

Metal Gon If you are on a well private or community we recommend using a full bottle of Metal Gon to keep any problematic minerals in a liquid state, thus preventing unwanted buildup in your hot tub's plumbing lines and mechanical equipment. Turn on your spa's jet pumps and pour the full bottle of Metal Gon in your spa's filter compartment. Allow the jets to run for 30-45 minutes and then turn the jets off. You need to allow the Metal Gon to circulate through the spa's plumbing lines over the next 8-12 hours. We do not recommend adding anything else to your spa water until 8-12 hours has passed. It's important not to rush this step. **Stain and Scale** If you are on city water, instead of using Metal Gon, we recommend using one third of the bottle 34 oz of Stain and Scale. Run your spa's jet pumps for 30 minutes and then allow the spa to circulate for the next 8-12 hours. Proceed to next step. If your Alkalinity is high, you may use a tablespoon of Muriatic Acid to reduce the Alkaline reading or you may use pH decreaser, which is also a dry acid and will reduce the overall Alkalinity. Make a note of whatever modifications you make so you will have a good idea of what to expect the next time you fill your hot tub and proceed to the next step. This will establish a base of sanitizer in your new Caldera Spa and rid the water of any organics introduced thru your water hose. Install your Mineral Cartridge inside of your spas filter and secure the filter cap and lid. This will help keep your water fresh and clear by removing organics. Weekly You may want to add 12 tablespoons weekly of a granular dichlor while running a "clean cycle" during periods of frequent and excessive use. Test your water for pH and Alkaline levels and adjust if needed. Monthly Clean your filter, even if it looks clean, at least once a month. This will remove all organic and mineral build up and will help keep your water fresh and clean.

Just rinse it with a hose on a high power nozzle to release all undesirables. Quarterly Replace your Mineral Cartridge. These have a finite lifespan of four months and should be refreshed 3 times a year. Clean your spa cover to remove any mildew and apply a protective coat of CoverShield to the top of the cover. Drain and refill your spa as needed. This is normal and do not be alarmed. Ozone system effectively burn out the remaining free chlorine, so you will be left with clean, fresh water and none of the heavy chlorine smells that you normally see in spas with no ozone system. **FOR FRESHWATER SALT System Customers** Here's a helpful video to watch before you start up your new hot tub. Refer to your Freshwater Start Up Guide for easy, stepbystep instructions for starting up your new salt water hot tub. Sign up for our Newsletter today. Please upgrade your browser to improve your experience. Each Caldera hot tub is engineered and built with the strictest attention to quality and efficiency. Our commitment is your assurance of reliable, energyefficient performance for years of worryfree hot tubbing. And that saves you money. After all, your spa should take care of you, not the other way around. Stress can negatively affect your immune system, your social interactions and your health in general. The ability to fully let go, to completely power down, is so vitally important to your overall wellbeing. So, yes, we take comfort very seriously. As you move from seat to seat, jets focus on those groups, one at a time, including your neck and shoulders, the large muscles of your back, lower back, hamstrings, calves and feet. Rotate through the circuit for totalbody restoration or just concentrate on the areas that need the most attention. A Caldera spa is

yours to personalize as you see fit. Combined with the buoyancy of the water, the seat's design releases pressure off parts of the body that are under force all day.

Our seats are also designed in a way that help keep the water's buoyancy from floating you out of the seat. After all, it's hard to relax when you're fighting the water to stay in place. Perfectly positioned hydrotherapy massage melts your tension away. And a whisperquiet sound dampening design enhances the comfort experience. According to the textbook *Comprehensive Aquatic Therapy* by industry experts Dr. Bruce Becker and Dr. Andrew Cole, immersion in warm water is a "unique healing environment" that can lead to temporary relief from muscle aches and pains. It's a gleaming, highstrength material that gives the spa it's contemporary look and fluid impression. The transformed Paradise design features a new vision of the spa shell design, one that's minimal, elegant, and contemporary. Its curved lines add to the spa's beauty with an uplifting impression. Choose from an array of conveniences including steps, cover lifters, hand rails, umbrellas and hydro massage jet kits all designed to help you relax and enjoy your own private retreat. All the zone lighting is adjustable. In addition to their interior lighting, the Paradise Series models feature corner and perimeter lighting that intensifies the beauty of the area immediately surrounding your spa. For the ideal setting in or around a hot tub, it's important to have components designed to deliver high fidelity sound in a wet, outdoor environment. We offer a range of integrated music options so that you can find the entertainment system that works best for you. Select models work on wrists and calves. You can also regulate the force of the massage. For less than the cost of a summer vacation we now have the luxury of soaking away the summer evenings, gazing at the stars. It is a stress relief and source of comfort. It is the most comfortable spa we have had, heats very fast, and it is well insulated holds the warmth. Very happy we went Caldera.

The Olympia model will run the onespeed jet pump on high speed when the button is pressed for a fourth time, and turn the jets off when the button is pressed for a fifth time. You can operate the jets on high speed by pressing the Jets button, but this will affect the timer settings. The settings can also become deactivated or locked, or can be affected by a malfunction that has nothing to do with your operation of the spas keypad. In these cases, the timer will need to be unlocked or reset. The timer will run the jet pump on low speed for the 60 minutes during the filter cycle, and 12 hours after that for 30 minutes. If you place the jet pump on high during the filter cycle, the filter icon will blink in the display and not resume until 10 minutes after the jet pump is shut off. Either the SLOCspa lockor TLOCtemperature locksymbol will display. Now the timer settings should be available. This should reset the system and fix any timer settings. She is a professional screenwriter and youngadult novelist and was awarded the MarionHood Boesworth Award for Young Fiction in 2008. Kingston holds a Bachelor of Arts in English from Mills College. Show Comments. Whatever your requirements were confident well be able to find the right choice for you and your family from our vast range of hot tubs for sale in store at our Cardiff showroom. Please upgrade your browser to improve your experience. It is a beautiful addition to our patio area. We spend quite a bit of time in it. Plenty of room for several people! Love it! The spa design is perfect for my use. Love it! Love it! We use it in the early morning to enjoy coffee and the birds chorus to begin our day. We use it at night to wind down the day and relax It's very comfortable and easy to use and care for! Enjoy the hydrotherapy benefits without struggling to resist the effects of bouyancy. When the powerful jets are off, you'll simply relax in the spacious interior, designed to cradle you in comfort you can really feel. The system operates at very low wattage to filter water and actually reduces heater use since 80% of the energy used to operate it is transferred to the water as heat. A patented system vents the heat produced by the pump motors out of the equipment area to create cooler operating conditions, prolonging the life of your Caldera spa's components. The system makes it easy for you to manage the infrequent replacement of bromine and mineral cartridges so you can enjoy sparkling clear spa water every time you dip into your Caldera hot tub. An auxiliary control panel, on Utopia Series spas, lets you operate your spa's components from a second location within the spa. Made of a durable, marine grade vinyl, it features child resistant safety locks and conforms to all applicable ASTM safety standards.

Our triple layer DuraBond reinforcement system strengthens the tough acrylic surface for proven, time tested performance. Enjoy the hydrotherapy benefits without struggling to resist the effects of bouyancy. When the powerful jets are off, you'll simply relax in the spacious interior, designed to cradle you in comfort you can really feel. Our jets are configured to give you a targeted, soothing massage. As you move from seat to seat in what we call Hot Tub Circuit Therapy, major muscles are massaged. Similar to working out muscle groups on a strength training circuit at the gym, our circuit therapy helps relax and transform those areas most likely to store stress and pain, from the bottoms of your feet to the tightened muscles of your shoulders and neck. Whether you select a Utopia or Paradise Series hot tub, you'll find every seat is ergonomically sculpted to cradle you body. Releasing that stress can improve both your physical health and your overall attitude, and affects nearly every part of life, from how well your immune system functions to how well you relate to the people around you. You enter a spa with tension; you emerge changed. You become more relaxed and you are calmed. The warmth of the spa helps increase circulation, so you heal better and faster, you become more flexible and limber and pain is alleviated. It's the ultimate calming experience. We pay a great deal of attention to the styling of our products for that reason. Caldera Spas' elegant, organic style delights your senses with flowing lines, sculpted jet recesses, ergonomic controls, beautiful lighting and soothing sounds. We're sure you'll experience positive change each time you emerge from the waters. We also know a well designed hot tub or spa has an inviting visual appeal that draws you in and helps you relax.

We pay a great deal of attention to the styling of Caldera hot tubs and options such as lighting and

entertainment so that you can create an environment that facilitates personal transformation. Choose from an array of conveniences including steps, cover lifters, hand rails, umbrellas and hydro massage jet kits all designed to help you relax and enjoy your own private retreat. To customize the experience, you're able to choose from six colors, three levels of brightness and the spa areas you want illuminated. Listening to music can help you relax and reset your priorities. Choose an integrated MP3 or Wireless multisource sound system. To really complete your spa entertainment package, add a waterproof Wireless TV. It is an ideal and affordable style complement to a growing hardscape trend. The transformed Utopia design features a new vision of the spa shell design, one that's minimal, elegant, and contemporary. In addition to their interior lighting, the Utopia Series models feature corner and perimeter lighting that intensifies the beauty of the area immediately surrounding your spa. For the ideal setting in or around a hot tub, it's important to have components designed to deliver high fidelity sound in a wet, outdoor environment. We offer a range of integrated music options so that you can find the entertainment system that works best for you. Select models work on wrists and calves. Going on more than 2 years with this spa. This Spa is in the elements every day It's our very own private retreat. It has become the hub for our most intimate conversations and favorite moments. Just the two of us can sit and relax together, soaking up every ounce of relaxation It has great jets that get to muscles our other tubs never reached without some body twisting. No regrets about this high quality tub. The jets are amazing. We had it for 9 years great for the kids and especially adult time.
